PROFESSIONAL PROFILE

Motivated IT graduate with a strong foundation in software development, data-driven systems, and enterprise IT concepts. Experienced in backend development, database design, data analysis, building Salesforce CRM applications, and system-oriented problem solving through academic, assistantship, and personal projects, as well as professional experience in IT Support. Seeking graduate or entry-level roles where I can apply my technical skills, continue learning, and contribute to building reliable, well-structured technology solutions.

TECHNICAL SKILLS

Programming & Development: Python, Java, C#, C++, Object-Oriented Programming, Django, Spring Boot, .NET, ASP.NET

Salesforce: Apex (Triggers, Classes, Test Classes), SOQL & Aggregate Queries, Lightning Web Components, Custom Objects & Fields, Salesforce CLI, Permission Sets, Lightning App Builder

Databases & Data: SQL, PostgreSQL, MongoDB, Data Modelling, Normalization, Query Optimization, ETL/ELT concepts

Systems, Networking & IT Support: TCP/IP Fundamentals, Windows, Helpdesk, Network & Device Troubleshooting, Software Support, Hardware Maintenance

Analytics & Visualization: Exploratory Data Analysis, Data Cleaning, Matplotlib, Seaborn, Power BI

Tools & Platforms: Git/GitHub, GitHub Actions (CI/CD), Docker, PyTest, Oracle SQL Developer, Azure (Foundational), Apache Kafka, Excel, Cisco Packet Tracer

Soft Skills: Teamwork & Collaboration, Problem-Solving, Communication, Critical Thinking

PROJECTS

Socio-Economic Wellbeing Analysis (NIDS) – Data Visualization Project
Personal Project | January 2026

- Built a scalable Python-based data pipeline to clean, validate, and harmonise National Income Dynamics Study (NIDS) survey data across 5 waves covering 30,000+ households and 150,000+ records
- Produced longitudinal visualisations exposing persistent inequality, widening mean-median gaps, and uneven urban-rural economic recovery across South African provinces
- Committed reproducible chart outputs to GitHub so findings are visible to recruiters without requiring dataset access

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn

Heritage Site Information System – Data & Backend Engineering Project
Personal Project | 2024 – 2026

- Designed and developed a data-driven web application using Django with PostgreSQL for transactional data and MongoDB for analytical workloads
- Created normalized relational schemas and implemented complex SQL queries for reporting and analysis
- Developed REST-style APIs, applied service-layer architecture, and implemented automated testing

Technologies: Django, PostgreSQL, MongoDB, SQL, Git, PyTest, Docker

---

NGO Donor & Programme Management System — Salesforce CRM Application

Personal Project | February 2026

- Designed and deployed a full Salesforce CRM application with 3 custom objects (Programme, Donation, Beneficiary) and 22 components including formula fields, master-detail relationships, and province-based picklists
- Implemented DonationTrigger using a thin-trigger / fat-handler architecture with bulkified Apex logic and governor-limit compliant design
- Automated recalculation of Total Donations and implemented high-value donor flagging for donations exceeding R10,000
- Achieved 86%+ Apex test coverage across 7 test cases, including bulk validation and high-value donation thresholds
- Built a Lightning Web Component dashboard displaying programme funding progress, live donation totals, and beneficiary distribution by province
- Managed deployment and testing through Salesforce CLI, including metadata deployment, org authentication, and command-line test execution

Technologies: Salesforce, Apex, SOQL, Lightning Web Components, JavaScript, Salesforce CLI, Git

---

EDUCATION

Bachelor of Science in Information Technology

North-West University
February 2022 – November 2025

WORK EXPERIENCE

IT Support Intern

Mpumalanga Economic Growth Agency (MEGA), Mbombela
March 2026 – Present

- Provide technical assistance to staff and end-users by troubleshooting hardware, software, and network issues.
- Assisting with system installations, updates, and routine maintenance to ensure smooth IT operations.
- Gained hands-on experience in diagnosing and resolving technical issues across Windows and Office environments.
- Strengthened teamwork by collaborating with senior IT staff on larger projects such as system upgrades and network configuration.
